Overview

Type	Enterprise Survey [en/oth]
Identification	KHM-NIS-PS-2010-v1.0
Version	Production Date: 2010-10-27 Version 1 - Final dataset of the economic census of pilot survey.
Series	The Pilot Survey of 2011 Economic Census of Cambodia (PS2010) was conducted by the National Institute of Statistics of the Ministry of Planning. from 1 to 31 March 2010, with 1 March 2010 as the reference date, covering the entire territory of the Kingdom of Cambodia.

Abstract

Toward EC2011, the pilot survey aims to:

(1) gain statistical data on the current Cambodian economy which are comparable with the results of EC2011;

(2) gain the updated list of large-scaled establishments;

(3) test the form and other documents; and

(4) test the work procedures of every stage of the enumerators, supervisors, local government offices and NIS.

An establishment is an enterprise or part of enterprise which is situated in a single location and in which only a single (non-ancillary) productive activity is carried out or in which the principal productive activity accounts for most of the value added. This conforms to the International Standard Industrial Classifications (ISIC) Rev.4 of the United Nations. Generally speaking, there are three kinds of establishments: fixed, movable, and I-8 mobile. "Fixed" means an establishment running some economic activity always in the fixed place and building. "Movable" means an establishment running some economic activity always in the fixed place, but it is possible to move the place easily. And "mobile" means an establishment running some economic activity on the run. Since the PS2010 covered "fixed" and "movable" only, unfixed "mobile" was not included in these final results.

Sampling

Sampling Procedure
(1) All the villages were stratified into 72 strata by 24 provinces and 3 characteristics of villages (dominant industry in each village: B-F, G-I and J-U except T of ISIC),and 1-5 villages were sampled randomly from each stratum to select 199 villages/Enumeration Areas in total.
(2) Establishments with 99 persons engaged or less existing in the 199 selected villages were enumerated, and appropriate multipliers were used to estimate national total figures from the data thus collected.
(3) In addition, all the large-scaled establishments with 100 persons engaged andmore (estimated to be around 600 establishments) were enumerated throughout the country.

Data Collection	
Data Collection Dates	start 2010-03-01 end 2010-03-31
Time Period(s)	start 2010-03-01 end 2010-03-31
Data Collection Mode	Face-to-face [f2f]

Data Collection Notes
Enumerator and ARO
- The enumerators are employed temporarily for the pilot survey. Each enumerator is assigned to one village area or one Enumeration Area to accomplish his/her duties on the prescribed way.
- The AROs are in charge of the enumeration of the large-scaled establishments with 100 employees and more persons engaged.
- Training of local staff, supervisors, and enumerators The training of the local staff, RO, ARO, supervisors, and enumerators are basically done by the eligible staff of the NIS.
- Mapping work
Village Boundary Maps of the selected villages are drawn on the basis of Village Map of 2008 Population Census in order to instruct the survey area to the enumerators. Villages with 100 and more establishments are divided into Enumeration Areas. The Enumeration Area Maps are drawn in order to instruct the survey area to the enumerator.
Submission of documents to the superior organizations
- The enumerators submit the documents including the pilot survey forms which are scrutinized completely to their supervisor no later than April 1st (Thursday) 2010.
- Finally, ROs submit the documents handed from Directors of Provincial Planning Departments to the NIS staff concerned no later than April 7th 2010 after checking.

Data Processing & Appraisal

Data Editing
Coding is a part of the manual editing process that quantifies the descriptive answers to questions that are not pre-coded. The questionnaires used for the Pilot Survey 2010 of economic census have a number of questions for which descriptive answers should be recorded. Descriptive information collected in the survey that should be coded before entering the data into computer are listed below.

Questionnaire Form
- Registration to the Ministry of Commerce or Provincial Department of Commerce Q4.1 to Q4.
- Kind of Main Business Activities which this establishment only is engaged in Q11
- Kind of business activities of the entire enterprise that include not only those of this Head Q14.1 to Q14.2

Other Processing
A pilot survey processing centre was established at the NIS to process the PS2010. A network of PCs with high capacity PCs as servers was installed.
Entire data processing was done on microcomputers and data entry and editing was carried out using Computer Processing System package developed by the ICT Department.
At the end, the keyers and verifiers were trained for five days and key entry operations commenced. In all key entry and verification staff and supervisors were trained by the Data Processing Specialist.
- First entry
- Second entry
- Matching between first entry and second entry
- Computer editing and imputation

ISIC_PS2010_Khmer_English.pdf, National Institute of Statistics, January 2009, Cambodia [khm], Khmer [khm], "Docs\ISIC_PS2010_Khmer_English.pdf"

Description

The International Standard Industrial Classification of All Economic Activities (ISIC) is the international reference classification of productive activities.Its main purpose is to provide a set of activity categories that can be utilized for the collection and reporting of statistics according to such activities. (Translated into Khmer languguage)

The document provides the codes used for the Establishment Listing 2009 and the Pilot Survey 2010 of 2011 Economic Census of Cambodia and the equivalent ISIC Rev. 4 .

Abstract

(i) it compiles, generates and analyses a wide range of economic, social and environmental data and information on which States Members of the United Nations draw to review common problems and to take stock of policy options; (ii) it facilitates the negotiations of Member States in many intergovernmental bodies on joint courses of action to address ongoing or emerging global challenges; and (iii) it advises interested Governments on the ways and means of translating policy frameworks developed in United Nations conferences and summits into programmes at the country level and, through technical assistance, helps build national capacities.
